PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience building scalable, production-grade web applications across CRM, ERP SaaS, and AI-driven systems. Proven track record delivering microservices architecture using NestJS and Next.js at IE-Networks Solution, contributing to SelamNewu Workspace — an integrated ERP SaaS platform. Experienced in automation workflows (N8N, Zapier), Telegram Mini App development with 1000+ active users, and backend optimization using Redis caching. Proficient in TypeScript, React, Next.js, NestJS, Node.js, Express.js, MongoDB, PostgreSQL, Supabase, and Tailwind CSS. Passionate about clean architecture, real-world impact, and continuously expanding technical depth. Experienced in designing scalable SaaS systems used by real clients and handling multi-tenant architectures.

WORK EXPERIENCE

Full Stack Engineer

IE-Networks Solution — 2025 – Present

- Contributed to SelamNewu Workspace, an integrated ERP SaaS platform built with microservices architecture using NestJS (backend) and Next.js (frontend).
- Developed and maintained CRM SaaS features across multiple client-facing projects, handling complex domain logic and multi-tenant data.
- Implemented Redis caching to optimize API response times and reduce database load across high-traffic services.
- Designed and consumed RESTful APIs between microservices, ensuring clean service boundaries and reliable data flow.
- Collaborated with cross-functional teams in an agile environment, participating in code reviews and architectural decisions.
- Built and maintained full-stack features across frontend (Next.js) and backend (NestJS), handling business logic, API design, and database schemas for scalable SaaS systems

Full Stack Developer (Remote – Ghana)

Synergy LTD — Aug 2024 – Nov 2024

- Built responsive full-stack features using Next.js, TypeScript, and Node.js based on Figma designs.
- Improved UI rendering and system efficiency by 60% through performance optimization.
- Identified and resolved bottlenecks in frontend logic and API interactions.
- Integrated frontend with backend APIs and ensured seamless data flow across the platform.
- Collaborated remotely with cross-functional teams, contributing to code reviews and best practices.

Freelance Automation & Mini App Developer

Self-employed — 2024 – Present

- Built and deployed multiple Telegram Mini Apps currently serving 1000+ active users.
- Designed and delivered automation workflows for clients using N8N and Zapier, covering lead management, notifications, and data pipeline automation.
- Handled end-to-end delivery: requirements gathering, building, testing, and client handoff.

EDUCATION

Wolkite University — Bachelor of Science in Computer Science

Gurage, Ethiopia | June 2025

Key Focus Areas: Data Structures and Algorithms, Software Engineering, Web Development, Problem Solving.

PROJECTS

SelamNewu Workspace (IE-Networks Solution)

- Integrated **ERP SaaS** platform with **microservices** architecture serving multiple business modules.
- Worked on NestJS backend services and Next.js frontend, ensuring modular and maintainable code.
- Applied Redis caching strategies to improve performance of frequently accessed endpoints.

Technologies: NestJS, Next.js, TypeScript, PostgreSQL, Redis, Docker

Customer Management System (CRM) - (IE-Networks Solution)

- Engineered a scalable, **multi-tenant CRM** within an integrated ERP SaaS platform, utilizing a microservices architecture to ensure secure data isolation across distinct client organizations.
- Developed full-stack features using **NestJS** (backend) and **Next.js** (frontend), focusing on modular code to streamline the onboarding and configuration of new tenants.
- Applied Redis caching strategies to improve performance of frequently accessed endpoints.

Technologies: NestJS, Next.js, TypeScript, Automation, PostgreSQL, Redis, Docker

Telegram Mini Apps (1000+ active users)

- Designed and deployed multiple Telegram Mini Apps with real active user bases.
- Handled authentication, UI/UX, and backend API integration within Telegram platform constraints.

Technologies: React, Node.js, TypeScript, Telegram Bot API

SymergyLTD Website

- Full-stack web interface for a Ghana-based startup with responsive UI and optimized API integration.
- Enhanced performance and responsiveness by optimizing rendering and state management.

Technologies: Next.js, Tailwind CSS, TypeScript, Node.js

AI Native Resume Analyzer

- Full-stack AI-powered resume analysis tool using React, Node.js, Supabase, and Gemini API.
- Optimized with indexing, Redis caching, and modular API architecture for fast load times.

Technologies: React, Vite, Supabase, Tailwind CSS, Node.js, Express.js, MongoDB, Gemini API

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Antd Component, Tailwind CSS, Styled Components

Backend: NestJS, Node.js, Express.js, Supabase, RESTful APIs, Microservices Architecture

Databases: MongoDB, PostgreSQL, Redis (Caching)

Automation & Mini Apps: N8N, Zapier, Telegram Bot API, Telegram Mini Apps

DevOps & Tools: Git, GitHub, Docker, Postman, Render, GitHub Pages, CI/CD

Testing: Jest

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration, Time Management, Communication

Languages: Amharic (Native), English (Fluent), Arabic (Basic)
